Send IT Match Day - 3 Oct.

By Charl Gous

Send IT founding member Pieter
Eksteen frequently reminds us of his
favourite motto: "Jou planne moet nooit
opraak nie", loosely translated as "You
should never run out of ideas". At Send
IT, we embrace this motto to achieve
our goal of promoting sports-shooting,
with a particular focus on Extreme Long
Range (ELR). We aim to be creative in
what we do, not just boldly following
what is popular elsewhere, but to
design and create sports-shooting
events that are unique to South Africa
and comply with the firearm constraints
we have become accustomed to.

Over the year, Send IT has put together a training day and an ELR Central World Record Attempt, developed and hosted the first .22LR ELR rimfire match in South Africa and will have arranged two large-calibre ELR events by the end of 2020. Bar Covid-19 and the associated social-distancing regulations, the numbers would have been even more impressive. What was once a pipe dream of a couple of friends has developed into a fully-fledged sports-shooting format that is challenging, time efficient and, most importantly, enjoyable.

For the 3 October event, minor changes to the match format, scoring system and range were made. Most notable was the introduction of an additional attempt on the furthest target on each course. Shooters will now engage the first two targets with two shots per

target and will be allowed three shots on the third target for a total of seven shots per range (previously six). The range consists of four courses for a total of 28 shots on match day.

Match participants are essentially tested four times, at extended ranges, over the day

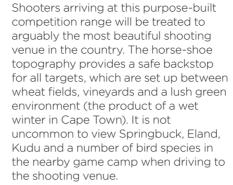

Match participants are essentially tested four times, at extended ranges, over the day. Shooters producing more consistent results will come out tops, while still staying engaged for the entire day. An additional benefit is that all participants experience the same atmospheric conditions and start and end the match at the same time of day.

The course layout was marginally changed to incorporate a 1855 m target and allow appropriate spacing between Ranges 3 and 4. As an additional upgrade, all targets are now fitted with two hit indicators to eliminate the risk of equipment failure and to ensure that impact shots are recorded accurately.

The distance in respect of each of the targets is illustrated below:

Distance in meters	Range 1	Range 2	Range 3	Range 4	
Target A	1258	1395	1427	1538	
Target B	1349	1539	1560	1690	
Target C	1467	1651	1855	1765	

As an added perk, shooters are treated to a marvellous view of Table Mountain and the seaside while participating in the competition. However, given the proximity to sea level, the altitude is extremely low, negatively affecting ballistic performance. Strong winds and bad weather are a constant threat at the coastline and provide additional challenges in estimating the impact on bullet trajectory. Don't let the distance fool you – shooting at sea level adds plenty of meters to the target.

Match day

Having spent countless hours worrying about rain and previous challenging conditions at Send IT competitions, it was comforting to know that we could, at last, expect a sunny day with mild winds for the match. After a brief morning meeting, shooting started promptly at 08:00, with a mild 10 to 13 mph wind pushing from 3'o clock.

This venue is well-known for catching out shooters with their wind calls, and it was no different this time. The mountain ranges flank in different directions, pushing the wind up or down the mountain to the path of least resistance. Additionally, the bullets fly through a vacuum naturally created by the drop-off from the shooting platforms towards the opposing mountain range, resulting in variable wind speeds.

By midday the 3'o clock wind had moved to a 5 to 7'o clock wind, while maintaining a range of 8 to 14 mph. On numerous occasions the big red flags set up closer to the targets indicated substantially less or more wind than that experienced at the firing point – and in some instances the flags indicated that the wind was moving in an opposing direction. Wind calls proved critical in determining the

NOVEMBER/DECEMBER 2020 • ISSUE 24

appropriate ballistic solution, where a mere half an hour 'fault' in determining the wind direction was enough to push the bullet past the targets on the further ranges.

Results analysed

Tallying up the scores is always a highlight – not just to determine which teams and individuals ended on top, but to highlight shooters that performed exceptionally well relative to their personal best and in comparison to those who make use of more specialised equipment.

Determining the best shooter of the day was easy: 13-year-old Gustav Liebenberg managed four successful hits with his little 6XC rifle. Under the watchful eye of his father Eben, he had successful impacts at 1 258, 1 349, 1 467 and 1 560 m to finish 30th in the individual ranking table. A remarkable performance for this young shooter!

Against stiff competition, Gareth Holtman, having replaced a fellow shooter at short notice, came 8th (individual) with a 300 WSM rifle. In addition, Jaco Rheeder delivered an astonishing performance with a 300 WM, coming 2nd on the individual ranking, and with teammate Johan Kuhn 2nd for team Star South. Jaco and Johan are experienced shooters and no strangers to the podium and frequently find themselves at the top of the log. The Send IT range and competition format was designed to achieve exactly this - to create a platform where modest ELR equipment can achieve competitive results.

Charl Gous, with the assistance of Pieter Eksteen (3rd placed individual), managed 1st place individual, and together they won the team category. Team Avo, consisting of DJ van Zyl and Danie du Preez, managed a solid effort to end 3rd in the team division.

It is easy to forget how demanding Send IT's match format is.

It is easy to forget how demanding Send IT's match format is: A shooter is only allowed two shots on Targets 1 and 2 and three on Target 3. There is limited margin for error, and match participants do not have the luxury of 'walking' shots in towards the target. The overall results achieved across the spectrum of shooters were good, with numerous personal bests at the far targets.

Camaraderie

Moving between the various shooting platforms, the camaraderie between

fellow shooters was tangible. More experienced shooters happily shared their knowledge and wind-reading ability with newcomers, and could be seen helping each other to set up and move equipment to and from the shooting platforms. Squads were deliberately made up of a mix of more experienced shooters and some who were new to the sport. These actions accelerate and ensure a transfer of

knowledge and experience on how to approach a stage. It is a great learning platform.

We are grateful for the 20 teams, consisting of 40 shooters, who supported this match and to all who have attended Send IT's past events. Interest in all forms of ELR shooting has experienced a meteoric rise, and numerous sports-shooting organisations, both formal and informal,

has developed across the country - long may it last!

These broadly self-funded initiatives create a vibrant market for firearm and equipment traders

These broadly self-funded initiatives create a vibrant market for those who trade in firearms and related consumables and equipment. We have witnessed a remarkable pick-up

in the quality of equipment entered for competitions and are aware of numerous new rifle builds in the pipeline.

Planning is well underway to host four ELR events in 2021 as well as two .22LR ELR matches. In addition, a lot of hard work is going into establishing a range to bring Send IT's ELR matches to the rest of the country (with a more central venue in mind) that will allow greater collaboration between ELR enthusiasts scattered all over South Africa. Please

find the official 2021 match dates for both formats on the right.: Finally, I want to thank the guys who put in countless hours to make this work: DJ, Hendrie, Michael, Nico and Pieter, thank you! 🕈

Until next time, get ready to ... Send IT!

Anyone in need of additional information can contact myself, Charl Gous, on 083 4696 181. Be sure to follow us on Facebook and find the link on our page to join the Send IT Telegram group where all communication is posted.
